

UI RECONSTRUCTION SPEC

# ChatGPT Android Screen-by-Screen UI Blueprint

A pixel-faithful reconstruction reference extracted from a 3-minute screen recording. Every screen, menu, popup, and settings page is documented with exact text, measured colors, and layout geometry — built for an AI agent to recreate the interfaces precisely.

**384 × 850**

# How to Use This Spec

---

This document is a complete inventory of every screen that appears in **screenrecording.mp4**, a 3-minute Android screen recording of the ChatGPT app in dark mode. The recording walks through a new chat, attachment and plugin menus, two web-search exchanges with rich news results, the side drawer, chat search, and the full Settings area including the plugin marketplace, personalization, theme, and accent pickers. Thirty distinct screen states are catalogued, each with a ground-truth frame image stored alongside this document in the `frames/` folder.

All pixel measurements are taken on the 384 × 850 recording canvas. The source phone was approximately 1080 × 2340 physical pixels, so recording pixels correspond closely to Android density-independent pixels (multiply by roughly 2.8 to recover physical pixels). Colors were sampled programmatically from the frames rather than estimated by eye, so the hex values are trustworthy within the tolerance of JPEG compression. When a color and a frame disagree, trust the frame.

Two elements visible in the recording are **not part of the app** and should be excluded from a faithful app recreation: the Android status bar (clock 17:12–17:15, the screen-recorder pill with red dot and elapsed timer, wifi/signal/battery icons) and the screen-recorder's floating gray touch-indicator dot that appears in many frames. The thin vertical gray line on the left edge of chat screens is the Android edge-back gesture affordance, likewise a system artifact. Section S16 documents the recorder overlay itself purely for completeness.

## DESIGN SYSTEM

# Global Palette

---

The app runs in full dark mode. The chat surface uses pure black, while chrome elements — pills, menus, rows, and the drawer — sit on layered dark grays. A single violet accent drives every interactive highlight, and user message bubbles use a darker violet of the same hue. The palette below was measured directly from the frames.

| TOKEN                                                                                                | HEX     | USAGE                                                                       |
|------------------------------------------------------------------------------------------------------|---------|-----------------------------------------------------------------------------|
|  bg / chat          | #000000 | Chat screen background (pure black)                                         |
|  bg / surface       | #202020 | Composer pill, popup menus, context menu, drawer, search bars               |
|  bg / row           | #404040 | Settings row cards, plugin rows, nav circle buttons                         |
|  accent / purple    | #A270F0 | Send / voice / stop buttons, Chat button, streaming dot, selected radio dot |
|  bubble / user      | #3A1D66 | User message bubbles (dark violet fill, white text)                         |
|  btn / primary      | #F0F0F0 | "Get India/Science headlines" CTA pill (black text)                         |
|  tag / pill         | #2E2E2E | Source chips, category tags on news cards                                   |
|  btn / scroll       | #303030 | Circular scroll-to-bottom button (white ↓ arrow)                            |
|  link / blue        | #8F9EC6 | "Upgrade plan" row text                                                     |
|  danger / red     | #C24B59 | "Delete", "Log out" labels and icons                                        |
|  text / primary   | #FFFFFF | Headings, message text, row labels                                          |
|  text / secondary | #B3B3B3 | Body copy, subtitles, helper text, icons                                    |
|  text / tertiary  | #8E8E93 | Timestamps, bylines, placeholders                                           |
|  key / keyboard   | #343844 | GBoard keys on #1C1C28 background                                           |

## DESIGN SYSTEM

# Typography & Recurring Components

The app uses OpenAI's **Söhne** typeface throughout (Inter is the closest free substitute; Roboto is an acceptable system fallback). There is no serif anywhere. The scale is compact: response titles are the largest text in the product at 24 px bold, and everything else tiers down from there. Line height on body copy is generous at roughly 1.6.

| ROLE                | SIZE / WEIGHT | EXAMPLE FROM VIDEO                               |
|---------------------|---------------|--------------------------------------------------|
| H1 — response title | 24px · 700    | "Latest news — September 19, 2026"               |
| H2 — section        | 20px · 700    | "Explore more news", "Read the original reports" |
| Card / item title   | 17px · 600    | "Anthropic weighs a new AI model..."             |
| Body                | 16px · 400    | Message text, settings labels                    |
| Small / byline      | 13px · 400    | "Reuters · September 19"                         |
| Section label       | 15px · 400    | "My ChatGPT", "Account", "Characteristics"       |

### Nav circle button — 44px circle · #404040

Circular tappable used for every top-bar action: hamburger , compose (pencil-in-square), , dots, back arrow , temporary chat (dashed circle), search . Glyphs are white, ~20px, stroke-based. On pure-black screens the circle is #404040; inside the drawer it is slightly lighter than the #202020 surface.

### Composer pill — h≈64px · radius 32 · #202020

Full-width minus 16px margins. Anatomy L → R: + attach icon (24px), placeholder text 16px #8E8E93, mic icon (24px white), then a 36px accent button in #A270F0. The accent button has three states: **waveform bars** (voice idle) → **↑ arrow** (text entered, send ready) → **■ stop** (assistant streaming). Placeholder text evolves: "Ask ChatGPT" on a new chat, "Reply to ChatGPT" after the first response, "@" in mention mode.

### Action icon row — 24px glyphs · #B3B3B3

Sits under every completed assistant message, left-aligned, ~40px spacing: copy (two overlapping squares), thumbs-up, thumbs-down, speaker, share-nodes,  more. Tapping  is one route to the message context menu (S17).

### Settings row card — h 56–64px · radius 12 · #404040

Every settings row is its own card with a 6px gap to the next — not a continuous list. Anatomy: 24px leading icon, 16px white label, optional 14px #B3B3B3 subtitle, optional right chevron  or affordance glyph. Section labels ("Account", "Preferences") float above groups in 15px #B3B3B3.

## Keyboard (GBoard dark) — bg #1C1C28 · keys #343844

Toolbar row: grid, sticker, GIF, gear, translate, palette, mic. QWERTY layout with number super-hints on the top row; bottom row is ?123, , , , space, . , enter. The enter key shows a return arrow in chat contexts and a magnifier on the search page. A collapse chevron sits at the far bottom-left.

### SCREENS 01 - 10

## Chat Surface

The recording opens on the phone's app drawer, launches ChatGPT, and explores the empty-chat composer: the attachment popup, the "Add files" sheet, and the @-mention plugin pickers. The user then sends "Hi", receives the greeting, and sends a web-search prompt that streams in a rich news response with headline cards.

### s01 Android App Drawer 0:00 – 0:02

Video start → tap "ChatGPT" icon (black circle, white OpenAI knot, row 6)

- Blurred colorful wallpaper under a dark scrim; centered pill tabs **Personal** (active: white pill, black text) | **Work** (gray) in a #3A3A3A container.
- App grid, 4 columns, 56px circular icons + 12px white labels: Amazon, Among Us, Apple TV, Arrows / Arrow Puzzle, Asphalt Xtreme, Atomic Chat, Authenticator / Authenticator, bigbasket, BHIM, Bistro / Blinkit, BookMyShow, Brave, Brawl Stars / Calculator, Calendar, Camera, Canara ai1 / **ChatGPT**, Chrome, Claude, Clock / Compass, Contacts, Contacts, CRED.
- Right edge: A-Z index scrollbar. Bottom: 48px "Search" pill #2A2A2A above white gesture bar.

frame: frames/01-android-app-drawer.jpg

### s02 New Chat — Empty State 0:02 – 0:07

App icon tap → pure black canvas

- Top-left: 44px circle #404040 with hamburger ≡. Top-right: 44px circle with dashed-circle temporary-chat glyph.
- No greeting text, no suggestions — the body is empty black.
- Composer pill #202020 h=64: + icon · "Ask ChatGPT" placeholder #8E8E93 · mic · 36px #A270F0 button with white waveform bars.
- GBoard dark keyboard docked below (bg #1C1C28, keys #343844); collapse chevron bottom-left; recorder's gray cursor dot floats near composer right edge.

frame: frames/02-new-chat-empty.jpg

### s03 Attachment Popup Menu

0:10 – 0:13

Tap "+" in composer → popup anchored bottom-left

- Panel: radius 24, #202020, soft shadow, width ≈ 280px, 16px left margin.
- Five rows h≈56, each a 32px circular #404040 icon + 16px white label: **Camera** (camera glyph) · **Photos** (image glyph) · **Files** (paperclip) · **Plugins** (@ in circle) · **Think harder** (brain glyph).
- Composer stays visible behind on the right (mic + purple waveform button); keyboard docked below.

frame: [frames/03-attachment-menu.jpg](#)

### s04 "Add files" Bottom Sheet

0:13 – 0:15

Tap "Files" in popup → modal sheet rises, background dims to black

- Header row: 44px circle × (left) · "Add files" 17px bold white centered · 44px circle ⋮ (right).
- "Upload files" row: ↑ upload glyph + 16px white label, h≈56, then 1px #2A2A2A divider.
- "Recent" 15px #B3B3B3; below it two empty rounded thumbnails 165×165, radius 16, fill #1C1C1C.
- White gesture bar at bottom marks this as a modal sheet.

frame: [frames/04-add-files-sheet.jpg](#)

### s05 @ Mention — Plugins Tools

0:16 – 0:19

Type "@" in composer → tool picker panel appears

- Composer now holds "@" with cursor; accent button switched to ↑ send-ready.
- Panel radius 24 #202020; header "Plugins" 15px #B3B3B3; rows h≈56 with 24px leading glyphs: **Create image** (blue-green gradient image icon — row highlighted with #2E2E2E rounded background) · **Thinking** (lightbulb) · **Deep research** (gear) · **Create task** (checklist) · **Study** (open book).

frame: [frames/05-plugins-picker.jpg](#)

## s06 @ Mention — "Sketch" Plugin List

0:19 – 0:22

Scroll inside the @ panel → installed-plugins section

- Same panel geometry; header row shows a pen-nib icon + "Sketch" 17px white.
- Rows with 24px leading icons: **Hugging Face** (🤗 emoji tile) · **Lovable** (pink-purple gradient heart) · **Float** (white "F" glyph) · **GitHub** (octocat silhouette) · **Template Creator** (2×2 squares).
- Recorder dot near panel's left edge in this frame.

frame: [frames/06-sketch-plugin-list.jpg](#)

## s07 @ Mention — File Types

0:22 – 0:25

Continue scrolling the @ panel

- Top row "Presentations" cut off mid-scroll; visible rows use 28px app-style icons: **PDF** (red document tile) · **Documents** (blue doc) · **Spreadsheets** (green grid) · **OpenAI Platform** (gray gear) · **Visualize** (pink scatter glyph).
- Composer unchanged: "@" + cursor, purple ↑ send button, keyboard docked.

frame: [frames/07-filetype-mention-list.jpg](#)

## s08 Greeting Exchange

0:31 – 0:40

Send "Hi" → assistant replies

- Top bar changes: hamburger stays left; right side now has TWO 44px circles — compose and ⋮ dots.
- User bubble: right-aligned pill #3A1D66, white "Hi" 16px, padding ≈ 12×8, radius 22.
- Assistant reply: left-aligned white 16px "Hi! How can I help you today?" followed by the action icon row (copy · 👍 · 👎 · 🗣️ · share · ⋮) in #B3B3B3.
- Composer placeholder is now "Reply to ChatGPT"; accent button back to waveform state.

frame: [frames/08-greeting-exchange.jpg](#)

## s09 Message Sent — Streaming

0:46

Send "Search the web for latest news"

- New user bubble right-aligned #3A1D66 radius 22: "Search the web for latest news".
- Left margin shows a 12px #A270F0 pulsing dot — the assistant "thinking" indicator.
- Accent button morphs to ■ stop while streaming; recorder's gray dot on the right.

frame: [frames/09-message-sent-streaming.jpg](#)

## s10 News Response + Headline Cards

0:49 – 0:58

Streaming completes → rich response renders

- H1 24px bold: "Latest news — September 19, 2026". Body #B3B3B3: "What kind of news are you interested in? I can cover major headlines, India, world affairs, technology, AI, business, or sports." Then bold "Top headlines".
- Card anatomy: 100×100 r12 thumbnail left; right column stacks a colored category pill (11px bold — "AI Business" blue #3B82F6, "Andhra Pradesh" green #22C55E, "World" red #EF4444), 17px bold title, 15px #B3B3B3 body, dark #2E2E2E source chip with favicon, and a 13px #8E8E93 byline.
- Cards shown: ① Claude logo thumb — "Anthropic weighs a new AI model ahead of a potential IPO" — "Reuters reports that Anthropic is considering a model launch amid competition with OpenAI and questions about growth and profitability." — Reuters chip — "Reuters · September 19". ② "Andhra Pradesh approves ₹22,178 crore in projects" — "The state approved 28 industrial projects, with projected employment of 19,739 people..." — AP News chip. ③ "Indian IT shares rally amid global AI debate" — "Indian IT stocks rose on September 15 after calls for caution in AI development. The Nifty IT index had experienced a substantial decline earlier in 2026." — "Reuters · September 15". ④ fighter-jet thumb — "World" pill — "Poland conducts military aviation operations amid Russian strikes" — Sky News chip — "Sky News · September 19".

frames: [10-news-response-start](#) · [11-news-card-anthropic](#) · [12-news-card-poland](#)

SCREENS 11 – 15

# News Modules

Scrolling past the first response reveals an interactive category selector rendered inside the chat, followed by a sources block. The user then sends a second, more specific India prompt, which streams a second news response with photographic cards, an original-reports list, and a closing suggestion.

## s11 Explore More News — Category Radios

1:01 – 1:08

Scroll down inside the news response

- H2 20px bold "Explore more news". Below it an interactive card: black fill, 1px #2A2A2A border, radius 16, padding 16.
- Card title 17px bold "Choose a category"; radio rows h≈36: **India** (selected — 20px ring with white outer ring and filled white center), then World, AI & Technology, Business & Markets, Science, Sports, Entertainment (unselected rings #8E8E93).
- Full-width CTA pill h≈44 #F0F0F0 with black 15px semibold label — "Get India headlines" (label follows the selected category).
- Disclaimer 15px #8E8E93 below the card: "These are selected reports from September 19, 2026, not a comprehensive live news feed. Details may change as stories develop." Then action icon row, then a Sources row: three overlapping 20px favicon circles (Sky News red, YouTube red, white "W") + "Sources" 13px.
- 44px circle #303030 scroll-to-bottom button with white ↓ floats centered above the composer.

frame: [frames/13-explore-more-news.jpg](#)

## s12 Sources / YouTube Links

1:10 – 1:16

Select "Science" radio → [sources list updates](#)

- Radio state: Science now selected (filled dot #B3B3B3), India deselected; unselected row labels render dimmer.
- "Sources" 15px #B3B3B3 label, then link rows separated by 1px #2A2A2A dividers. Row anatomy: favicon, 16px semibold white title, 14px #8E8E93 description, 13px timestamp.
- Row 1 — sky news favicon: "Ukraine war latest: Poland launches jets - as Russia repels massive ..." / "Russian attacks on Ukraine overnight have prompted Poland to launch precautionary ..." / "Yesterday".
- Row 2 — YouTube red play icon + "youtube": "Malayalam News Live | HD 24x7 Live Streaming | 24 News - YouTube" / "Live Streaming for Malayalam Live News, Updates, Breaking News, Political News a..." / "February 18, 2024". A third YouTube row begins below the fold.

frame: [frames/14-sources-youtube.jpg](#)

### s13 India Prompt + "Searching..." Status

1:19 – 1:25

Send: "Search the latest news as of September 19, 2026, about India..."

- User bubble: multi-line right-aligned pill #3A1D66 radius 24, max-width ≈ 75%: "Search the latest news as of September 19, 2026, about India. Give me the major headlines with sources."
- Search status row left-aligned: 🌐 globe icon 20px #B3B3B3 + 15px #B3B3B3 text "Searching India latest news September 19 2026 major headlines India" wrapping to two lines — this is the live web-search activity indicator.
- Scroll-to-bottom button visible; composer accent button shows ■ stop.

frame: [frames/15-searching-status.jpg](#)

### s14 India: Major News Headlines

1:25 – 1:31

Search completes → second rich response streams

- H1: "India: Major news headlines". Byline 13px #8E8E93: "Saturday, September 19, 2026 · India".
- Intro 16px #B3B3B3: "Here are the major India-related developments reported today, covering international relations, domestic politics, weather, and cricket."
- Photo cards (same anatomy as S10): ① protesters-with-flag photo — gray pill "Regional affairs" — "Ladakh groups call off week-long protest march" — "Political groups in Ladakh have replaced a proposed week-long march with a symbolic one-day march planned for September 23, citing weather and changing political circumstances." — "The Times of India · September 19" — TOI chip. ② storm-clouds photo — blue pill "Weather" — "Heavy rain and thunderstorms forecast across several states" — "Weather reports cite India Meteorological Department warnings for heavy rainfall, thunderstorms and strong..."

frames: [16-india-headlines-start](#) · [17-india-news-cards](#)

## s15 Read the Original Reports 1:31

Scroll to bottom of India response

- H2 "Read the original reports"; bordered card (1px #2A2A2A, r16) with three rows split by 1px dividers. Row: 32px source logo + bold 16px name + 14px #B3B3B3 headline + right "Read ↗" outlined pill (1px #3A3A3A, radius 16, h 32, 13px white).
- Rows: **Reuters** (orange dotted-circle logo) "US sanctions, Russian oil and India's energy security" · **The Indian Express** (red slanted bars) "September 19 daily news briefing" · **The Times of India** (red TOI circle) "Latest India news and regional updates".
- Note 15px #8E8E93: "Note: This is a selection of reports available from the search, not a complete national news roundup. Some stories concern developments from earlier in the week."
- Closing 16px white with bold phrase: "I can also provide a separate roundup of **India's latest AI and technology news**, including startups, government initiatives and major company announcements." Then action icon row + Sources favicons.

frame: [frames/18-read-original-reports.jpg](#)

## SCREENS 16 - 19

# Overlays, Drawer & Search

Two overlay systems appear in this stretch: the Android screen recorder's own control panel (system UI, not the app) and the app's message context menu opened by a long-press. The user then opens the navigation drawer, scrolls the chat history, and enters the cross-device search page.

## s16 Screen-Recorder Overlay (System UI) 1:34

Not part of the app — document only if cloning the video look

- Dark #1C1C1C rounded panel, width ≈ 350px, top-left. Row 1: red dot + "Recording..." 15px white · elapsed timer "01:34" right-aligned.
- Row 2, four 36px circles: speaker (white bg, black glyph) · mic-crossed (gray) · pause (gray) · stop (red #E5484D with white square).
- Status bar in this frame shows network speed "1.10 MB/s" and 63% battery.

frame: [frames/19-voice-recording-overlay.jpg](#)

## s17 Message Context Menu

1:36

Long-press an assistant message → popup anchored top-right

- Panel: radius 20, #202020, shadow, width ≈ 250px, padding 8. Header "Greeting exchange" 15px #8E8E93 — the chat's title.
- Items h≈48, 20px leading icons + 16px white labels: Share · Pin · Add to project >(chevron) · Uploaded files · Find in chat · Add to home · Archive · **Delete** (red #C24B59, trash icon).
- Background chat content stays visible and static behind the menu.

frame: [frames/20-message-context-menu.jpg](#)

## s18 Side Drawer

1:42 – 1:51

Tap hamburger → drawer slides from left, width ≈ 81%

- Drawer bg #202020 with right-edge shadow over the black chat; drag line remains on the far-left edge.
- Header: "ChatGPT" 24px bold + 44px circle 🔍 search on the right.
- Menu rows h≈52, 24px #B3B3B3 icons + 16px white labels: Images (photo glyph) · Library (books) · Projects (folder) · Scheduled (clock) · Plugins (@).
- 1px #3A3A3A divider, then chat history — plain 14–16px white rows, no icons, single lines: Greeting exchange · Vercel MCP Configuration · Anime List Without Fanservice · Sliding Window Maximum Sum · Explain Changes · Assess Website Legitimacy · Fix Ollama Syntax Error · OpenAI Platform Search · Zeta Mittag Leffler Discovery · Build Bee Anatomy Website · Build sales dashboard · DNS troubleshooting steps · Create and delete file · ECNR Proof Documents · Type D Memory.
- Floating bottom bar over the drawer: purple "Chat" pill (h 52, radius 26, #A270F0, ⇐ + label), "JS" avatar 44px circle #3A3A3A white initials, purple waveform button at right.

frames: [21-side-drawer](#) · [22-drawer-scrolled](#)

## s19 Search Chats, Files & Projects

1:54

Tap drawer search icon → full-screen search

- Empty state centered ~35% from top: 56px rounded-square #2A2A2A containing a white 🔍, with "Search chats, files, and projects" 16px white beneath.
- Bottom search bar: pill #202020 h 52 with 🔍 + "Search" placeholder #8E8E93, plus a separate 44px circle × on the right.
- Keyboard's enter key becomes a magnifier (search action).

frame: [frames/23-search-chats.jpg](#)

# Settings & Plugin Marketplace

The final third of the recording is a systematic tour of Settings. From the JS avatar the user reaches the profile page, scrolls the account group, opens the Plugins page, browses the installed list and the marketplace, then reviews Personalization and the Appearance controls, ending on the Log out button. Every row label below is verbatim.

## s20 Settings — Profile Page 2:00

Tap JS avatar in drawer → settings

- Page bg #000000. Header: 44px circle ← back on the left; "John Smith" 17px #B3B3B3 centered.
- Label "My ChatGPT"; group rows (56px cards #404040 r12, 6px gaps): Personalization (smiley) · Memory (book) · Plugins (2×2 grid).
- Label "Account"; group: Workspace / "Personal" (briefcase) · **Upgrade plan** (blue #8F9EC6 text, sparkle icon) · Subscription / "Go" (田 icon; gray drag-dot at right) · Usage and limits (bar chart) · Trusted contact (lifebuoy) · Parental controls (person-heart) · Email / "pikachuok5@gmail.com".

frame: [frames/24-settings-profile.jpg](#)

## s21 Settings — General List + Appearance 2:03

Scroll the settings page

- Collapsed "Appearance v" card (sun icon) with a nested "Accent color" row: brush icon, purple dot, "Purple" label, v chevron.
- Group rows: General (gear) · Notifications (bell) · Voice (waveform) · Safety (shield-check) · Security and login (shield-gear) · Remote control (screen-cast) · Storage (archive) · Data controls (database+) · Ads controls (megaphone) · Report bug (bug).

frame: [frames/25-settings-appearance-general.jpg](#)

## s22 Settings — Account Detail

2:06

Continue scrolling

- Full Account group with contact rows revealed: Email / "pikachuok5@gmail.com" · Phone number / "+917416514679" (phone-call icon).
- Below the group: "Appearance v" card and its nested "Accent color — Purple" row.

frame: [frames/26-settings-account.jpg](#)

## s23 Settings — Plugins Page

2:09

Tap "Plugins" row → dedicated page

- Header: ← back; "Plugins" 17px bold centered.
- Label "Preferences"; card "Permissions / Allow low-risk" with > chevron.
- A white loading arc spins mid-page while content loads.
- "Browse plugins" button: full-width pill h 52, #404040, 2×2 grid icon + 16px white label.

frame: [frames/27-settings-plugins.jpg](#)

## s24 Plugins — Added List

2:12

Plugins page finishes loading

- Rows h 56 (cards #404040 r12, 6px gaps) with 32px rounded-square app icons and 16px white labels, in order: Default templates (multi-color squares) · Documents (blue doc) · Froot (dark "F") · GitHub (octocat) · Hugging Face (🤗 tile) · Lovable (gradient heart) · PDF (red tile) · Plugin Management (green + grid) · Presentations (orange tile) · Spreadsheets (green tile) · Template Creator (2×2 squares).

frame: [frames/28-plugins-added-list.jpg](#)

## s25 Plugins Marketplace — Popular

2:21 – 2:24

Tap "Browse plugins" → marketplace

- Header: ← · "Plugins v" centered with dropdown chevron · ⚙ gear circle right. Search bar: pill #2020 h 44, 🔍 "Search plugins".
- "Installed" label + horizontal row of seven 40px tiles: Floom, Documents, GitHub, Hugging Face, Lovable, Default templates, PDF.
- "Popular" rows (40px icon · 16px title · 14px subtitle · right affordance): Gmail — "Read and manage Gmail" — 🔒 · GitHub — "Triage PRs, issues, CI, and publish..." — ... · Google Drive — "Drive, Docs, Sheets or Slides" — 🔒 · Google Calendar — "Manage Google Calendar events" — 🔒 · Notion — "Notion docs and workflows" — + · Slack — "Read and manage Slack" — + · icon cluster — "See Outlook Email, Granola, and more".
- After scroll: Figma — "Create designs, ship to code" — + · Slack (repeat) · "See Shopify, Wix, and more" with Shopify + Wix mini-icons.
- "Productivity" section: Granola (green spiral) — "Add your meeting context" · Fireflies (pink F) — "Search meeting transcripts" · Outlook Calendar — "Manage Outlook schedules" · Plaud — "Retrieve insights from Plaud" · Otter.ai — "Search meetings from Otter.ai" · Atlassian Rovo (Legacy) — "Manage Jira and Confluence" — all with +.

SCREENS 27 – 30

# Appearance Pickers & Closing States

The recording closes by exercising the two Appearance dropdowns, scrolling to the bottom of the settings list, and returning to the drawer with the recorder overlay visible — the exact final

## s27 Theme Dropdown 2:45

Expand "Appearance" → chevron flips to ^

- The Appearance card expands, revealing the "Accent color — Purple" nested row beneath it.
- Dropdown popup: dark #1C1C1C, radius 16, shadow, right-anchored overlapping the list. Rows h 44, 15px white: **System (Default)** · Light · Dark.

frame: [frames/32-theme-dropdown.jpg](#)

## s28 Accent Color Dropdown 2:48

Expand "Accent color" row

- Popup (same style, taller, w ≈ 210, right-anchored): rows h 44, each a 16px colored dot + 15px white label: Blue · White · Green · Yellow · Pink · Orange · **Purple** ✓ (active — white checkmark at the row's right).
- Dots sample the seven selectable accent hues; Purple matches the #A270F0 accent used across the app.

frame: [frames/33-accent-color-dropdown.jpg](#)

## s29 Settings Bottom + Log Out 2:57

Scroll to the end of settings

- Remaining rows: (General, partially cut) · Notifications · Voice · Safety · Security and login · Remote control · Storage · Data controls · Ads controls · Report bug · About (info icon).
- Final card: "Log out" — full-width h 56, #404040 r12, logout icon + 16px label, both red #C24B59.

frame: [frames/34-settings-logout.jpg](#)

## s30 Final Frame — Drawer + Recorder

3:00

Video ends on this composite state

- Side drawer open (S18) with the recorder overlay (S16) showing timer "03:00"; status bar reads "5.00 KB/s ... 63%".
- Drawer contents visible: Library · Projects · Scheduled · Plugins · history list · purple Chat pill · JS avatar.

## APPENDIX

# States & Micro-interactions

Beyond static layout, the recording demonstrates the behavioral rules an accurate recreation must honor. Each item below was observed directly in the video and should be implemented as described.

### Composer button morph · waveform → ↑ → ■

The 36px accent button cycles: waveform bars in voice-idle, ↑ when text is present, ■ stop while the assistant streams. The placeholder evolves in parallel: "Ask ChatGPT" → "Reply to ChatGPT" → "@" in mention mode.

### Streaming behavior

Assistant text renders progressively; a 12px purple dot pulses at the left margin while waiting; images and cards pop in as they load. The web-search phase shows a globe + "Searching ..." status line before content arrives.

### Category radios drive the CTA label

Tapping a category moves the white dot; unselected rows dim; the CTA label follows the selection ("Get India headlines" → "Get Science headlines").

### Menus, drawer, scroll button

Popups (attachment, @-picker, dropdowns) fade+scale from their trigger and dismiss on outside tap. The drawer overlays chat with a scrim, it does not push content. The circular ↓ button floats centered above the composer whenever the chat is scrolled up.

# Ground-Truth Frame Index

---

All 35 reference frames ship beside this document in the `frames/` folder at full 384×850 resolution. They are the authoritative visual source — if any written measurement conflicts with a frame, the frame wins.
